Crash Dump - Analysis Error - Advice Please Posted by Dermot Hayes - 13 Feb 2012 - 20:17

WinDbug Error - Advice Please

I created a folder for Symbols located as below:

C:Windows

In WinDbg I set a symbol path as below:

SRV*C:WindowsSymbols*http://msdl.microsoft.com/download/symbols/packages/WindowsVista/WindowsVis sVista.6002.090410-1830.x86fre.Symbols.exe

PDF created: 05 Nov 2025, 11:56

When I open the minidump that I want to analyse I get the following error Loading User Symbols Loading unloaded module list

Unable to load image lvuvc.sys, Win32 error 0n2

- *** WARNING: Unable to verify timestamp for Ivuvc.sys
- *** ERROR: Module load completed but symbols could not be loaded for lvuvc.sys

Any advise to help me resolve the issue and get WinDbg working properly would be Very much appreciated.

Thanks In advance
